

## A Tablet Based Education

Our Tablet based-education program is a unique initiative by TFT for the under-privileged children in India. One of our project is to offer education to under-privileged children in order to motivate them using out of the box methods for teaching. All the regular subjects are taught using the latest Google Nexus 7 tablets drive by several apps and softwares that are created for this program. This will put them in sync with modern technology as well as help them cope with subjects that they might otherwise find difficult.

This project is run by a team of dedicated members trained by professionals in the field.

## Dropln Centre

The Dropln Centre started their new coaching program called “LifeLine Coach”. This program is offered to various institutions and organisations. They have managed to sign a contract for one year with one of Bangalore’s leading Management institutes. The facility presently has a space of its own within the TFT office where people can come to avail counselling services. The Dropln Center is headed by a team of trained counsellors with good & relevant experience.

## Camps

TFT provides Camping to several schools, colleges, NGOs and corporate companies. Life Skills and outdoor based learning are imparted through our tailor made camps and we have seen the impact of these camps. In 2014 alone were able to reach over 4500 children through our various camps. One such camp was conducted at Krishnagiri, a three hour drive from Bangalore, for about 30 young girls who learnt a lot through our adventure program and activities. The other camp was for a leading International School in a city called Coimbatore, about 6 hours from Bangalore. It was for over 70 children. It was an

adventure camp with modules on flora & fauna and micro climate studies. Our adventure based outdoor programs enable students to be effective thinkers, problem solvers, communicators - celebrating uniqueness and learning various aspects of life. Camping is the heartbeat of our ministry in India and we hope to use this as a means to reach out to the millions of young people in India.

## Tusker Woods Campsite

Tusker woods BOYSC (Bethany Outreach Youth Service Centre) campsite and conference Centre is a recent project of TFT. This center is situated in the hamlet of Anaikatti, a location in the woods in South India. Tusker Woods is an ideal place for those wishing to camp out and to experience living in the wild. The Retreat Centre offers service camps where one can be involved in several service projects in the tribal hamlets in the region. The different types of programs at Tusker woods are Service project camps, youth camps, school camps, outdoor leadership camps, ecology camps, family camps and other tailor made camps. Most recently, A marriage seminar was conducted at our facility. There were over 20 young people that comprised of both married couples as well as individuals preparing for marriage. The seminar was a first of its kind and enabled young people to understand the need for such preparation both before marriage as well as in their married lives. It was a blessing to see them eager to learn. It was a huge success and we hope to organise many more such program for young people in the region.

**Prayer Points**

- God's blessing
- Camping Ministry
- DropIn Centre and counselling services
- TFT Staff, volunteers and interns
- Our Campsite - Tusker Woods
- School Programs
- Finances
- TFT's social initiatives
